

System.UnauthorizedAccess note folders are created but at first song rip fails

Tried different things:

From MP config: add pin - ko

From File System properties: share folder to everyone – ko

From MP config: uncheck dont import unknown... – ko

From MP config: set c:\utenti\cubotto\musica as folder (it's the default folder) – ko

From MP config: remove import to database and set to folder [D:\Mymusic](#)

Note: ripping same CD with Media Center works
