

AS/NZS 13818.5:1999  
ISO/IEC TR 13818-5:1997  
(Amendment No. 1 attached)

Australian/New Zealand Standard™

**Information technology—Generic  
coding of moving pictures and  
associated audio information**

**Part 5: Software simulation**

### **AS/NZS 13818.5:1999**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-001, Information Systems—Interconnections. It was approved on behalf of the Council of Standards Australia on 16 February 1999 and on behalf of the Council of Standards New Zealand on 31 January 1999. It was published on 5 May 1999.

---

The following are represented on Committee IT-001:

Australian Association of Chief Information Officers  
Australian Association of Permanent Building Societies  
Australian Bankers Association  
Australian Bureau of Statistics  
Australian Chamber of Commerce and Industry  
Australian Communications Industry Forum  
Australian Computer Society  
Australian Information Industry Association  
Australian Telecommunications Users Group  
Australian Vice-Chancellors Committee  
CSIRO Mathematical and Information Sciences  
Department of Communications and the Arts  
Department of Industry Science and Tourism (Commonwealth)  
EDS (NZ)  
Electrical Compliance Testing Association  
Telecom New Zealand  
Telstra Corporation

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

---

# Australian/New Zealand Standard™

## Information technology—Generic coding of moving pictures and associated audio information

### Part 5: Software simulation

First published as AS/NZS 13818.5:1999.  
Reissued with Amendment No. 1 attached (December 2002).

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-001, Information Systems—Interconnection. It is identical with, and has been reproduced from, ISO/IEC 13818-5:1997, *Information technology—Generic coding of moving pictures and associated audio information, Part 5: Software simulation*.

*Amendment No.1 (December 2002) is identical to ISO/IEC 13818-5:1997/Amendment No.1:1999, Advanced Audio Coding (AAC) and has been bound at the end of this Standard. The amendment relates to Clauses 1 and 5 and Annex A.*

The objective of this Standard is to supply designers of video and audio compression with a C language software simulation of an encoder and decoder for AS/NZS 13818.1:1997, AS/NZS 13818.2:1997 and AS/NZS 13818.3:1997.

The following three disks are included with this Standard:

- (a) Disk 1—Systems and video files.
- (b) Disks 2 and 3—Audio files.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

As this Standard is reproduced from an International Standard, the following applies:

- (i) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (ii) In the source text ‘this part of ISO/IEC TR 13818’ should read ‘this Australian/New Zealand Standard’.
- (iii) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to equivalent Australian or Australian/New Zealand Standards, as follows:

## AUSTRALIAN/NEW ZEALAND STANDARD

# Information technology — Generic coding of moving pictures and associated audio information — Part 5: Software simulation

## 1 General

### 1.1 Scope

This part of ISO/IEC 13818 provides a C language software simulation of an encoder and decoder for Part 1 (Systems), Part 2 (Video), and Part 3 (Audio) of ISO/IEC 13818.

### 1.2 References
